

REQUIRED FOR ASSET WORK

Shader Graph:

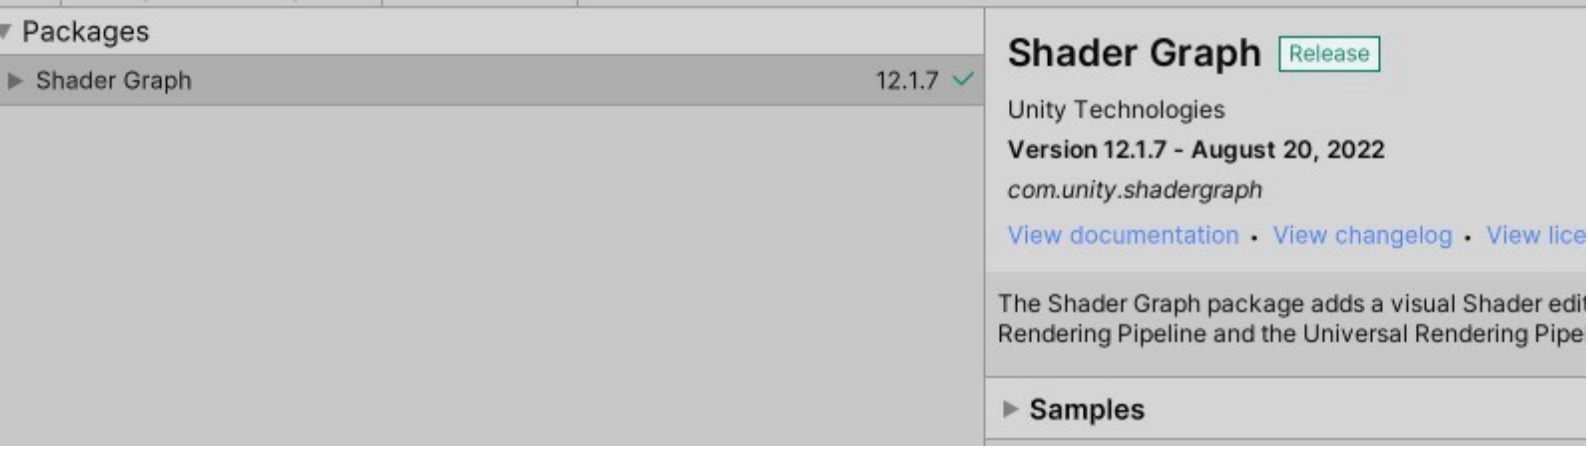

Go to the "Window" menu and choose "Package Manager."

In the Package Manager, click on the "Packages: Unity Registry" dropdown.

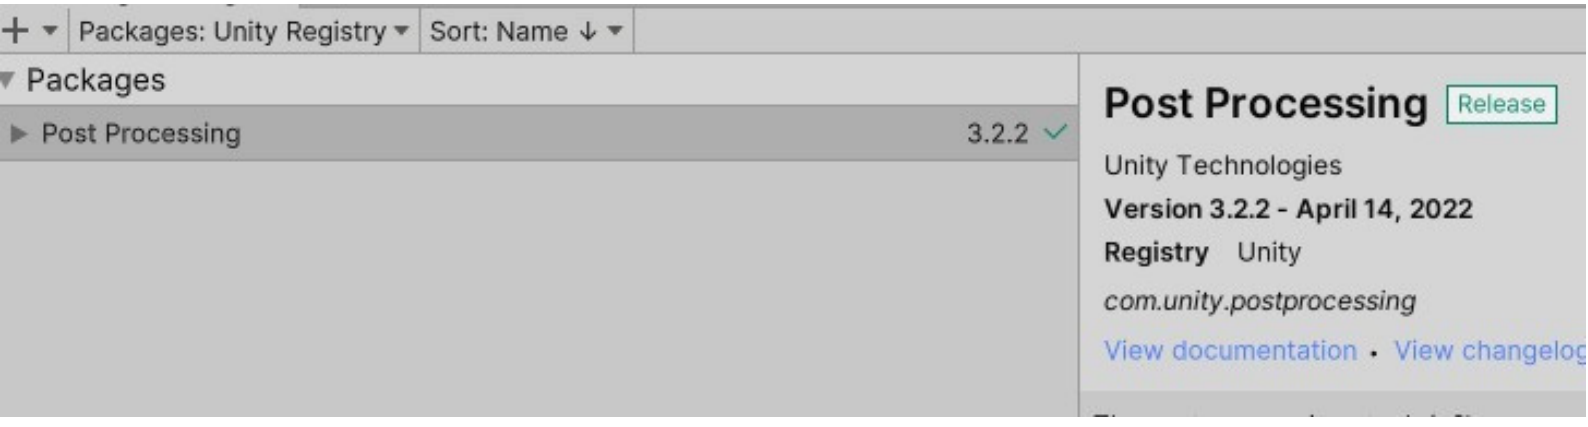

Search for "Shader Graph" in the search bar.

Click on "Shader Graph" in the search results.

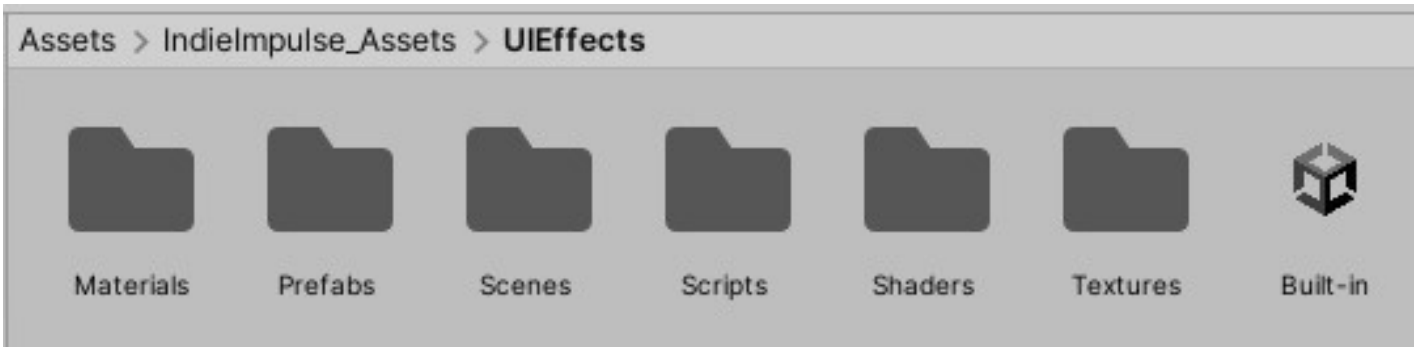

In the right panel, click on the "Install" button to download and install Shader Graph.

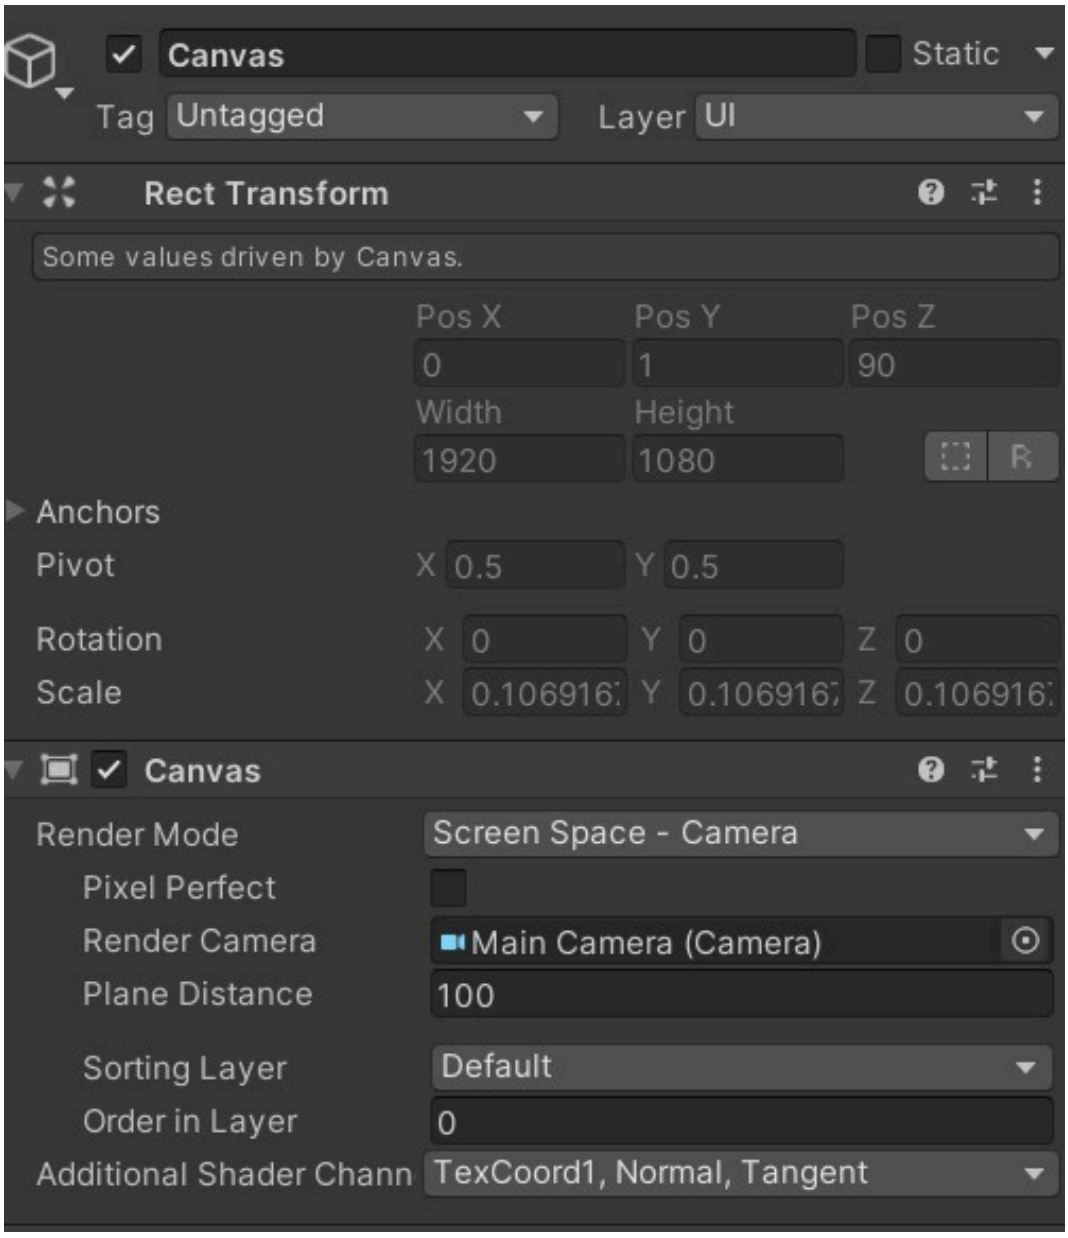

Go to the "Window" menu and choose "Package Manager."
In the Package Manager, click on the "Packages: Unity Registry" dropdown.
Search for "Post Processing" in the search bar.
Click on "Post Processing" in the search results.
In the right panel, click on the "Install" button to download and install Post Processing.

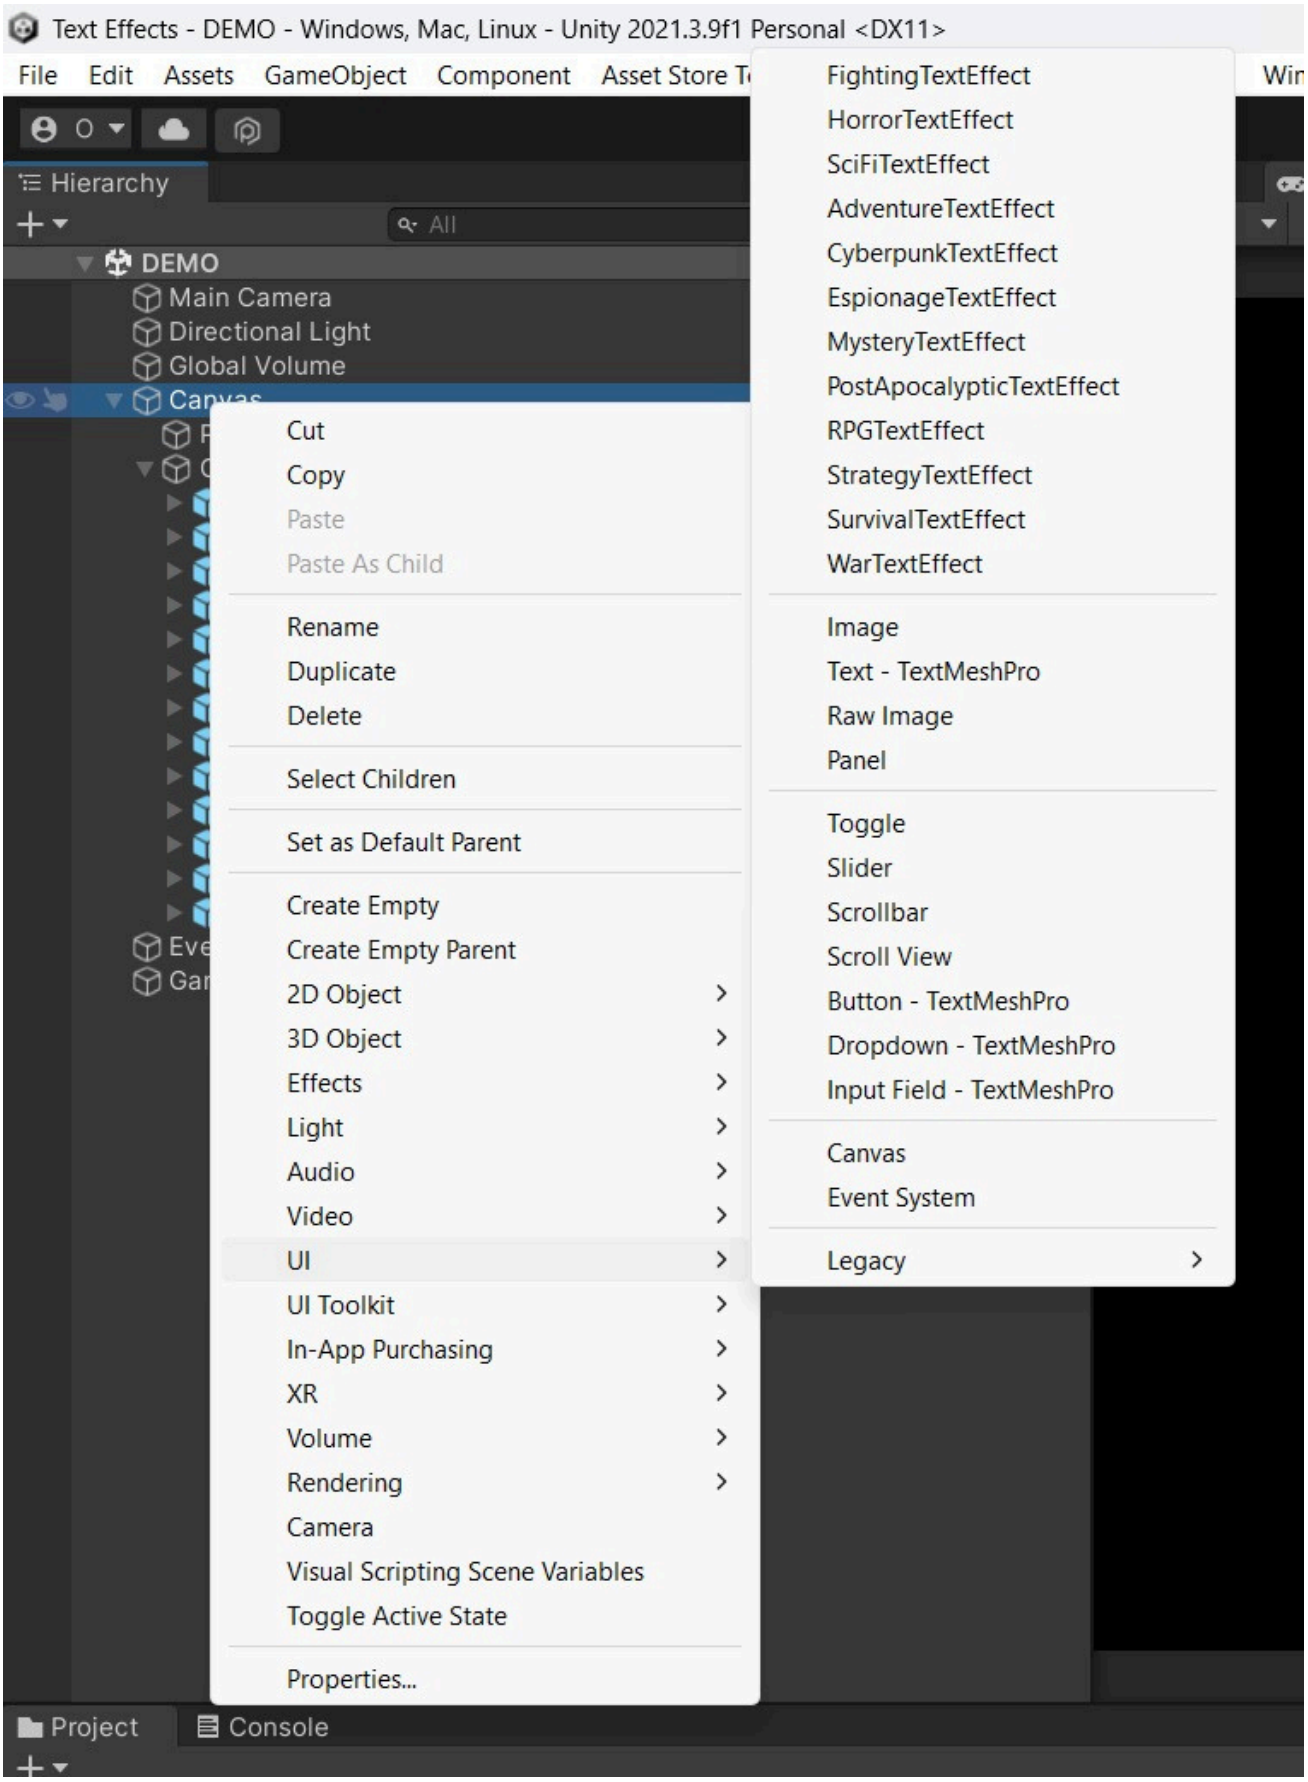

Import Built-in Package

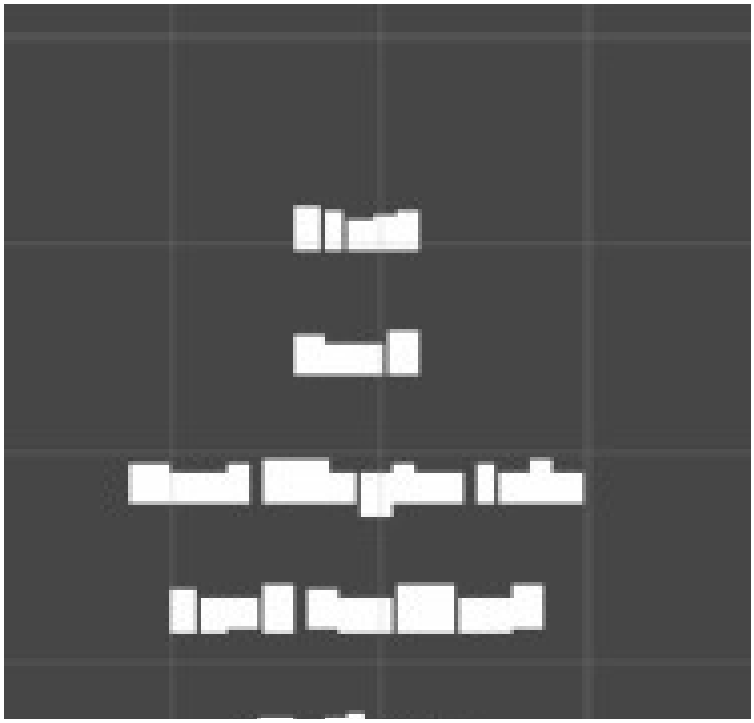

Create Canvas or use your own but change Render Mode to Screen Space- Camera

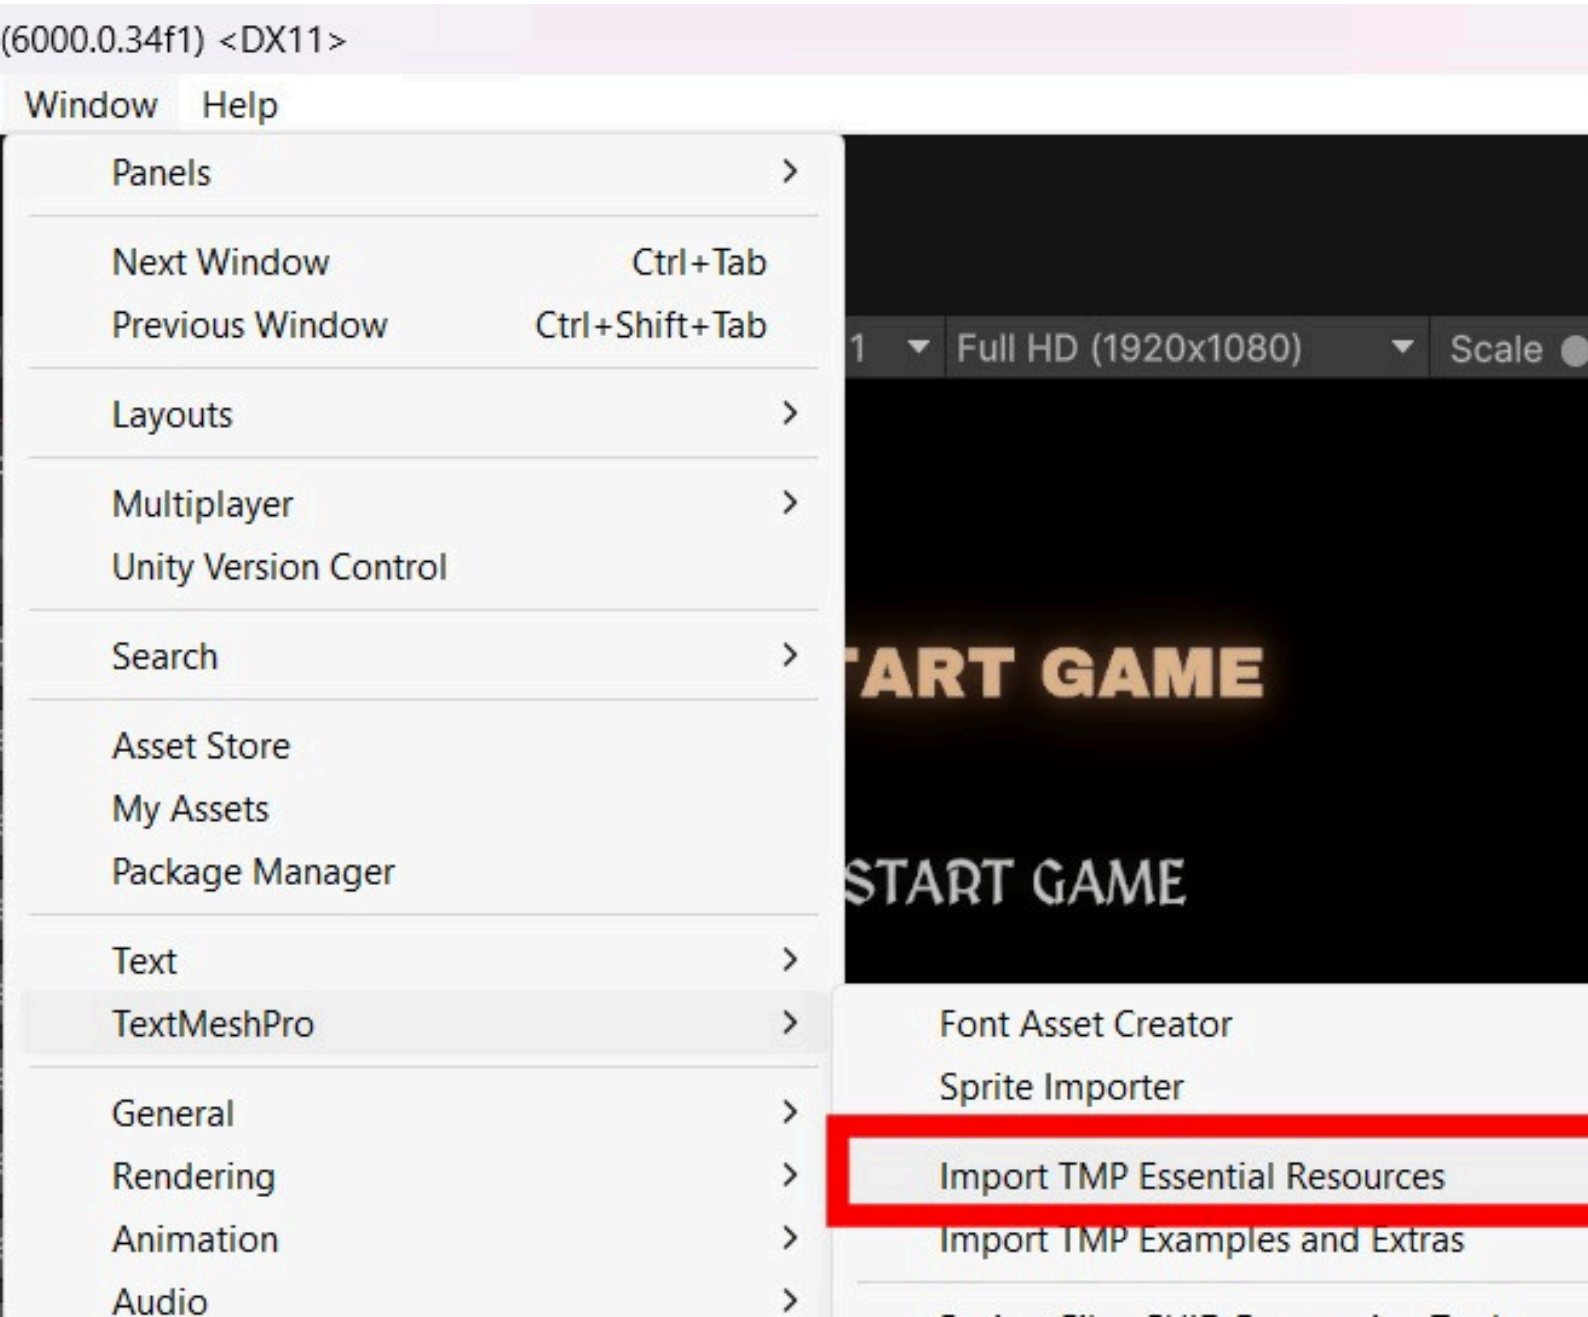

Add your Effect

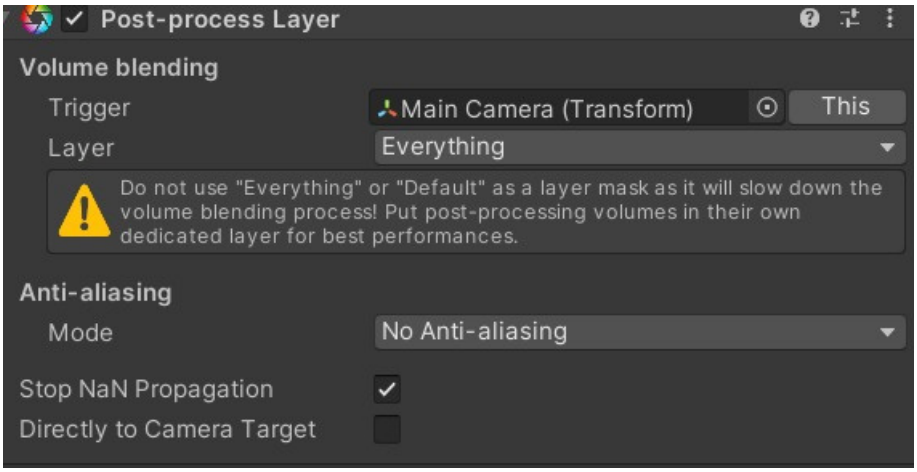

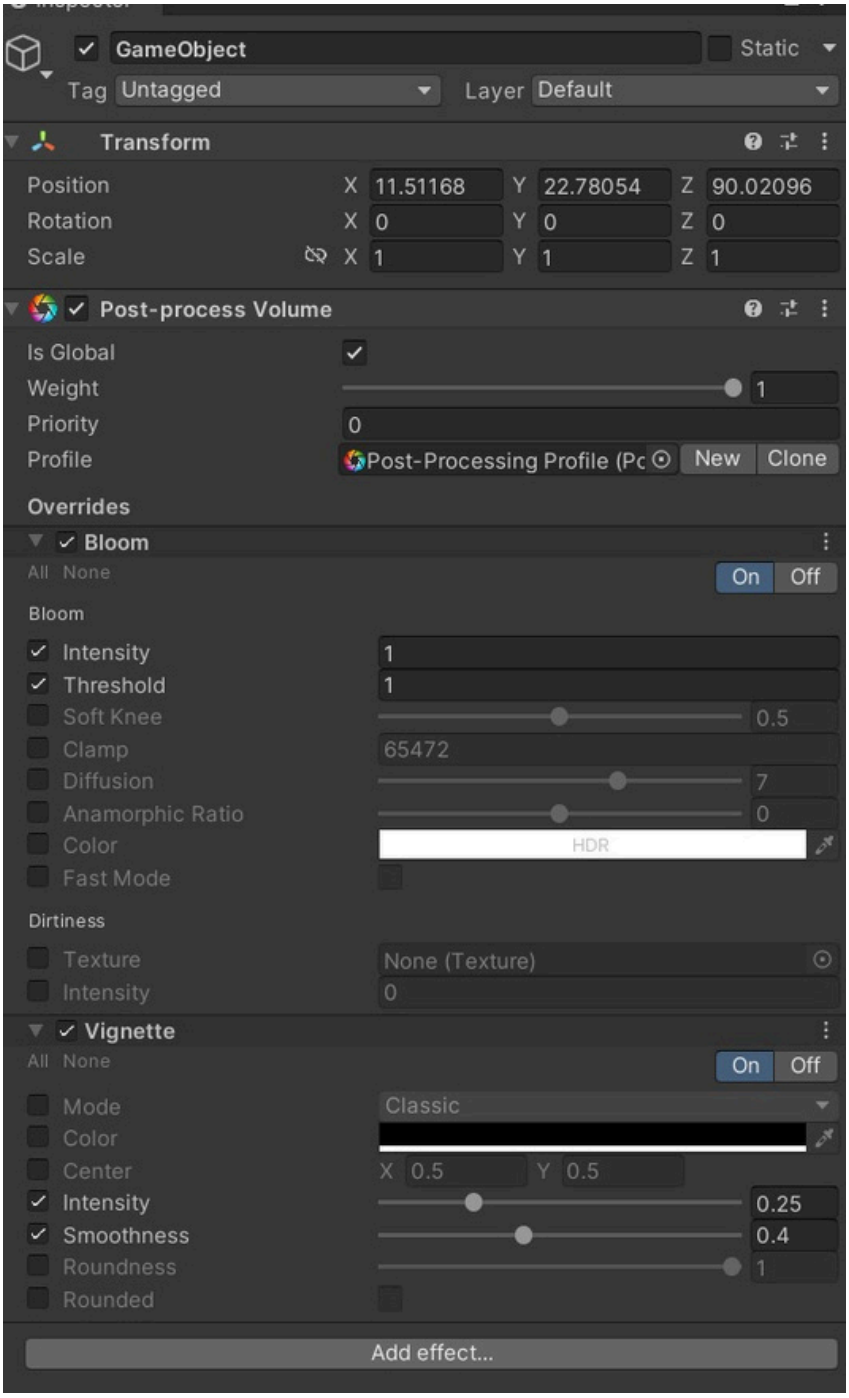

If you have this issue, please Import TMP Essential Resources

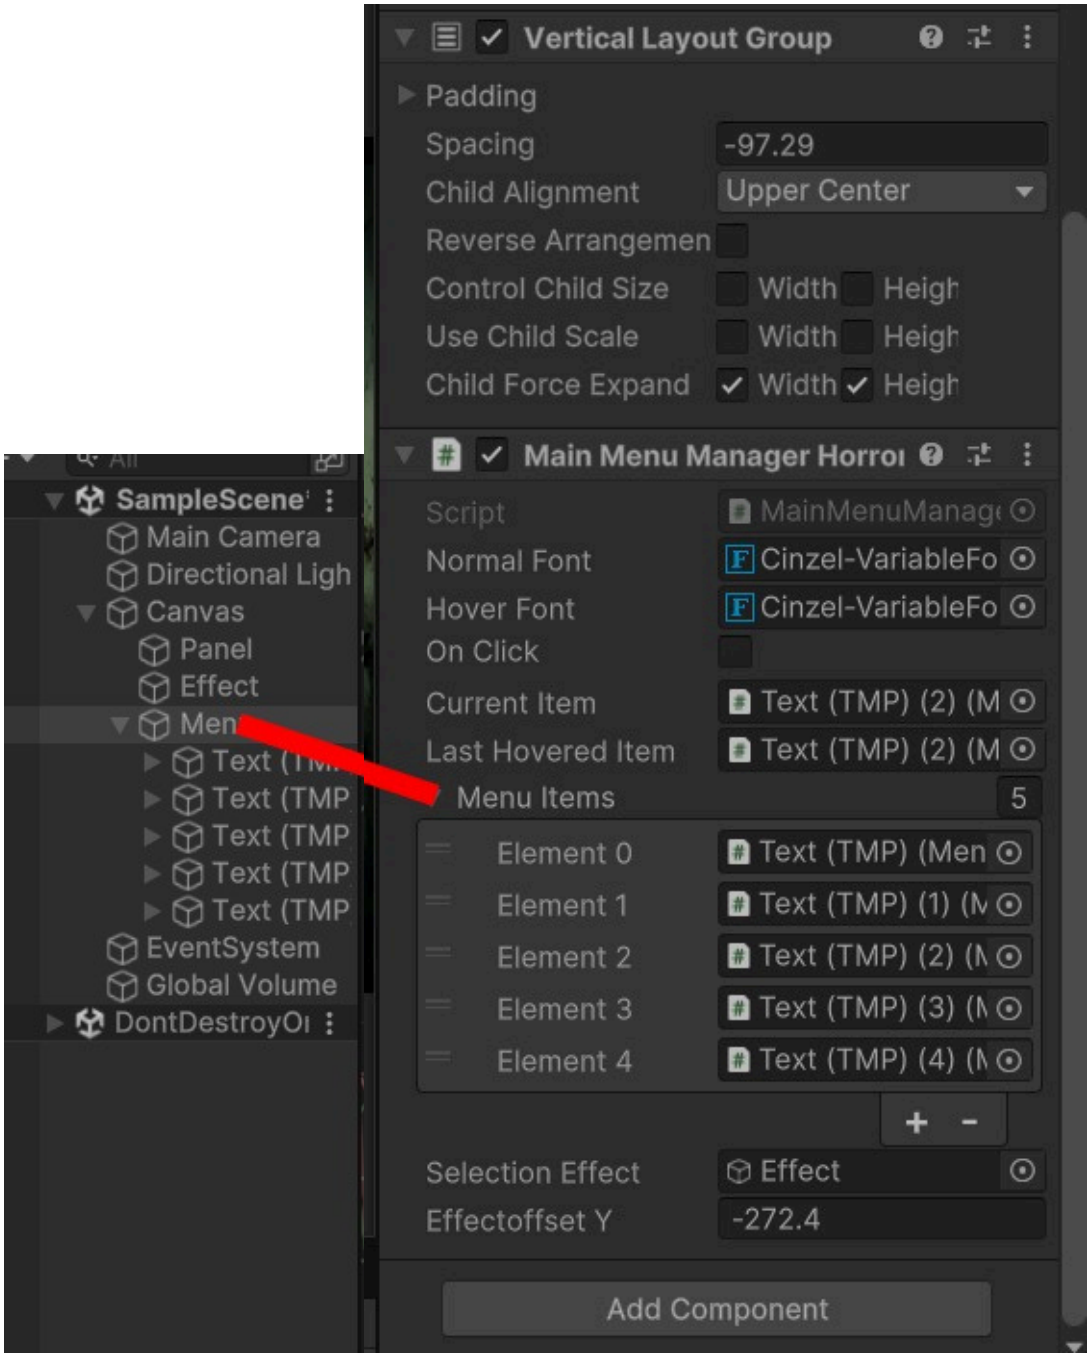

If you want to glow your effects you need to add post-processing your scene

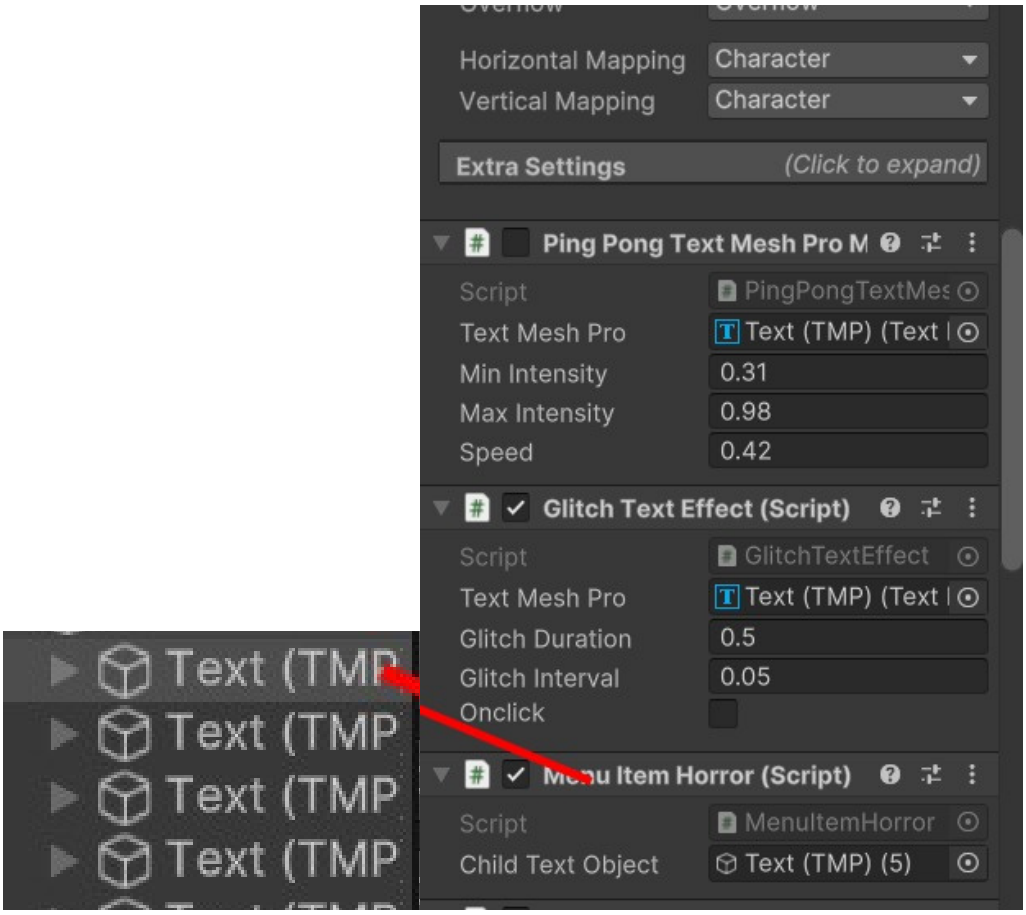

If you want to use menu use MainMenuManager, you need to choose a style, such as MainMenuManagerHorror. Then, assign the text to MenuItemHorror, and MainMenuManager will handle the rest.

You can check in demo scene
